

## P3.2: The regulatory challenge of nanotechnology (part 1)

- On all levels of governance, initiatives have been launched addressing nano regulation.
- WTI has delivered 2010 a legal opinion to the Swiss Federal Office for the Environment (FOEN) on nanotechnology and the pertinent WTO rules.
- On the global level the UN SAICM Strategic Approach to International Chemicals Management pays attention to nano regulation as an emerging issue. Next Ministerial Meeting ICCM3 in 2012.

## P3.2: The regulatory challenge of nanotechnology (part 2)

**The planned research will answer the following questions:**

- **Which are the best tools to address nano regulation (global, regional, domestic level) ?**
- **Which international treaties could be used as anchors for nano regulation?**
- **Can Public Private Partnerships play an active subsidiary role in nano regulation?**

## P3.2: The regulatory challenge of nanotechnology (part 3)

**WTO (TBT/SPS) compatible criteria to be met in labelling for food and non food products will be examined for the following three levels:**

- **In the Globally Harmonised System of Classification and Labelling of Chemicals**
- **In the context of REACH**
- **At a national level**
