

## RESEARCH HANDBOOK ON TRADE IN SERVICES

## Edited by **Pierre Sauvé**, University of Bern and **Martin Roy**, World Trade Organization, Switzerland

'The Research Handbook on Trade in Services is the most comprehensive study to date on one of the most relevant, albeit least explored areas, in the field of international trade policy. By adopting a multi-disciplinary approach that brings together the economic, legal and political economy perspectives of renowned experts, Pierre Sauvé and Martin Roy have made a significant contribution to better understanding trade in services. Trade policy-makers, practitioners and scholars will find solid evidence in this book to inform bold and comprehensive reforms to fully exploit the potential of the services economy.'

- Anabel Gonzalez, World Bank Group Global Practice on Trade and Competitiveness

RESEARCH HANDBOOK ON Trade in Services

Edited by Pierre Sauvé • Martin Roy

This *Research Handbook* explores the latest frontiers in services trade by drawing on insights from empirical economics, law and global political economy. The world's foremost experts take stock of the learning done to date in services trade, explore policy questions bedeviling analysts and direct attention to a host of issues, old and new, confronting those interested in the service economy and its rising salience in cross-border exchange.

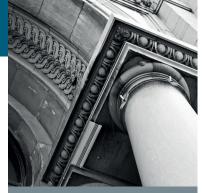

The Research Handbook's 22 chapters shed analytical light on a subject matter whose substantive remit continues to be shaped by rapid evolutions in technology, data gathering, market structures, consumer preferences, approaches to regulation and ongoing shifts in the frontier between the market and the state. Expert contributors explore the subject through a multidisciplinary lens, offering a comprehensive overview of lessons learned over two decades of GATS jurisprudence. The book further chronicles the rising stakes and involvement of developing countries in global services trade, notably their growing insertion in global value chains, as well as the latest advances and remaining challenges in the statistical measurement of trade in services.
